

## Hi Tech Eye Examinations

We now have a range of high tech equipment, which can investigate the health of your eyes in great detail. The OCT is advanced laser scanning technology that produces stunning HD Images of your eyes, even in 3D. This helps plan clinical care and early detection of deterioration which is especially useful in tumour detection, macular degeneration, glaucoma and diabetes.

We also use the GDX Pro laser scanning polarimeter for early glaucoma detection. This checks on the condition of the nerves at the back of your eyes. Visual field and corneal thickness assessments also add peace of mind to your comprehensive eye examination.

# Vision Plan

## The eye care you deserve

As professional Optometrists, caring for eyes and eyesight has been our prime concern for many years.

Increasingly technological advances and improvements in the understanding of the eyes have enabled great advances in the ability of optometrists to care for your eyes and detect problems early.

Over recent years we have invested significantly in new technology allowing us to give you, our patients, excellence in eye care.

Unfortunately this technology is not without a price and the current NHS eye examination fee does not cover what we consider to be a comprehensive eye examination.

Even a standard private eye examination fee is not designed to cover everything we can now offer.

Therefore we have introduced 'Vision Plan' designed to give you access to comprehensive eye care as required, when required for a simple monthly fee.

## How does it work?

Simple, for a monthly payment by Standing Order (see chart below) you will receive:

- A comprehensive eye examination including advanced 3D OCT scans which provide 3D cross sectional scan of the back of your eyes. This is invaluable in recording the health of your eyes and early detection of problems. Plus other investigations e.g. Retinal images, GDx nerve scans for glaucoma, as are appropriate. Enjoy peace of mind from this advanced eye examination.
- Additional examinations throughout the year as required.
- **25% DISCOUNT** on any spectacles and prescription sunglasses purchased once you join the plan.
- Contact lens aftercare (if contact lens option chosen).

**\*Not covered:** Dyslexia examinations, contact lens fitting, punctum plugs plus some investigations requested by consultants or DVLA - please ask for details.

## How much does it cost?

Use the chart below to select the cover you need i.e. do you wear contact lenses and are you entitled to NHS eye examinations (if you are unsure please contact the practice).

There is also a scheme joining fee of £25 payable at the time of the initial examination.

Cost per month (Standing Order)	With NHS Exemption	Without NHS Exemption
Without Contact Lenses	£10.30	£11.80
With Contact Lens Care	£13.30	£14.80

Then complete the form on this leaflet and return to the practice. Remember, cover starts as soon as the form is returned, there is no long term commitment, all we ask is that you remain in the scheme for at least 12 months.

We are sure you will see the benefits and stay in the scheme much longer.

## Vision plan application form

Please complete the form below, then give to us at your initial eyecare consultation.

Remember, the **Vision Plan** cover commences immediately on completion of the standing order form.

Title: Mr  Mrs  Miss  Other

Name:

Address:

Date of Birth:

Do you require contact lens cover? Yes  No

Are you entitled to NHS eye test exemption? Yes  No

Cost per month: £
